PABLA) Group Art Unit: 2174
Application No. 09/201,644) Examiner: Sax, S.
Filed: November 30, 1998) Attorney Docket No. SUNMP068
For: METHOD AND APPARATUS FOR DETECTING DEVICE SUPPORT IN A GRAPHICAL USER INTERFACE	ORIGINALLY FILED

MARKED UP CLAIMS

11. <u>In a computer system, a method of determining input device support of a screen element of a graphical user interface comprising:</u>

examining a class definition of a screen element of a graphical user interface to detect an ability to process an input device's events;

automatically identifying said screen element as supporting input device input if said class definition includes a method supporting said input device's input; and

[The method in accordance with claim 10 including the step of]examining a class definition of a superclass of the screen element if said class definition of said screen element does not include said method.

15. A computer program product comprising a computer usable medium having computer readable program code embodied therein for detecting input device support of a screen element of a graphical user interface comprising:

MARKED UP CLAIMS Page 1 SUNMP068/ASP/KDW

Application No. 09/201,

computer readable program code configured to cause a computer to examine a runtime version of said screen element of a graphical user interface; and[,]

computer readable program code configured to cause a computer to automatically identify said screen element as supporting an input device when input device-handling program code is associated with said screen element.
